EPA called, long story short, they are only now going to re-issue the NPDES permit (that they started to do back in 2014) for the 4 Corners Power Plant and Navajo Mine. Tom wanted us to know that they consider the issuance as part of the original proposed action, and not yet a future NPDES permit issuance, even though time has passed. I said okay and would note that by email exchange in our admin record for the BO. Also, I said that FWS and BIA were contracting Se and Hg studies on the rare fishes to get better toxicological data with which to incorporate into their permit limits. They were glad to hear it and were wanting to update us on their NPDES permit issuance status. that is all

I've been trying to call the (505)761-4709 number but it ends up "dead." I also tried the main number at the Albuquerque field office and got the same thing.

It doesn't seem to be on our end.

Maybe you could try calling me? I'm here now, and am generally in the office except for a 10 am and a 12 noon meeting.

Tom Hagler
